SLAVE DONGLE
AT 130 4008

The design of the station in two separate mobile stands is primarily intended for stationary emission stations for trucks, buses, and tractors. The Analyzer and Smoke Meter modules are permanently located in the stands at all emission stations, without the need to transport the smoke meter module in particular.

FIXATION SPLINT HEATED PROBE

Fixation splint

(AT1046027)

Length

2200 mm

Weight

2 kg

For heated probe

6 m

Optional for

AT 408 and AT 608
